

FEARNHILL
SCHOOL

Science subjects

This year we would like you to select a part of your chosen Science that interests you and carry out some research. You then need to prepare a 3 minute presentation, with visuals, that you will deliver to your class in September.

This is a chance for us to learn a little about you while you also have the opportunity to become the class expert in your chosen subject.

If you have chosen more than one science you will need to prepare one separate presentation for each subject
